Professional Summary

Software Developer with **3+ years of experience** building scalable web and mobile applications using **React.js, Next.js, React Native, TypeScript, and JavaScript**. Experienced in developing production-ready user interfaces, integrating REST APIs, implementing payment flows, and delivering high-quality user experiences across multiple platforms.

Led the end-to-end modernization of a mobile application serving **10,000+ users**, delivering scalable architecture, modern UI systems, and features including real-time chat, stories, subscriptions, and social engagement capabilities.

Experienced in collaborating with cross-functional teams in Agile environments and working with backend APIs and services. Familiar with backend technologies including **Node.js (Express)**, and comfortable integrating and working alongside systems built with **NestJS** and **Laravel**. Passionate about building maintainable, user-focused products and continuously learning new technologies.

Technical Skills

Frontend & Mobile: React Native, React.js, Next.js, JavaScript, TypeScript

State Management: Redux Toolkit, Zustand, TanStack Query, Context API

API & Integration: REST APIs, Webhooks, Socket.IO, Payment Gateway Integration

Backend Exposure: Node.js (Express), API integration with Laravel-based systems, collaboration with NestJS services

Databases: PostgreSQL, MySQL, Firebase Firestore

Tools & Collaboration: Git, GitHub, Postman, Firebase, GitHub Actions, Notion, ClickUp, Agile/Scrum

AI Tools: GitHub Copilot, Claude (AI-assisted development & debugging)

Professional Experience

Software Developer

Redblox Technologies Pvt. Ltd.

April 2023 — Present

Pondicherry, India

- Led the end-to-end modernization of the **Swypatune** mobile application using **React Native**, improving scalability, maintainability, and user experience for a platform serving **10,000+ users**.
- Designed and implemented a **modular, feature-based architecture**, enabling faster feature development, cleaner code organization, and improved application maintainability.
- Developed and maintained cross-platform mobile and web applications using **React Native, React.js, Next.js, TypeScript, and JavaScript**.
- Built advanced social engagement features including **real-time chat, stories, matching systems, user interactions, and push notifications**.
- Implemented real-time functionality using **Socket.IO**, including typing indicators, read receipts, online presence tracking, and live content updates.
- Integrated and maintained **REST APIs**, collaborating closely with backend teams and contributing to API enhancements across **Node.js (Express)** and **NestJS**-based services.
- Implemented secure authentication flows, subscription models, advertisement integrations, and payment processing using **Stripe, Paystack, and Flutterwave** with webhook-based transaction handling.
- Integrated **Firebase Authentication, Firestore, Cloud Messaging, and Crashlytics** to support authentication, push notifications, analytics, and production monitoring.
- Managed production releases and app store deployments (Android & iOS), ensuring stable updates and smooth release cycles across multiple versions.
- Improved application performance through **caching strategies, pagination, optimized API handling, and efficient state management**, delivering smoother user experiences across Android and iOS platforms.
- Implemented deep linking, third-party SDK integrations, application upgrades, and platform compatibility improvements while ensuring stable production releases.
- Collaborated with product managers, designers, QA engineers, and backend developers in **Agile/Scrum** environments and assisted in mentoring junior developers.
- Leveraged **AI-assisted development tools** including GitHub Copilot and Claude for code generation, debugging, documentation, and development workflow optimization.

Intern Junior Software Developer

Redblox Technologies Pvt. Ltd.

February 2023 — April 2023

Pondicherry, India

- Developed responsive user interfaces using **React.js** and **React Native** while contributing to live client projects under senior developer guidance.
- Integrated REST APIs, built reusable UI components, and gained hands-on experience with modern frontend and mobile development practices.
- Collaborated using **Git**, participated in code reviews, bug fixing, and Agile development workflows.
- Successfully transitioned to a full-time **Software Engineer** role based on performance, technical growth, and project contributions.

Key Projects

Swypatune – Social Music & Talent Platform (10,000+ Users)

Android | iOS

React Native, Redux Toolkit, TanStack Query, Socket.IO, Firebase Node.js (Express), NestJS, MySQL

- Independently led the complete development and maintenance of the **mobile application** using **React Native**, including architecture design, feature development, and production releases.
- Built and shipped advanced social features such as **real-time chat, stories, user matching, and subscription-based engagement** for a scalable user base.
- Implemented **WebSocket-based real-time functionality** including messaging, presence tracking, typing indicators, and live updates using **Socket.IO**.
- Integrated authentication, push notifications, AdMob monetization, and **payment gateway integrations (Paystack, Flutterwave, OGateway)** with secure transaction and webhook handling.
- Collaborated with backend developers for API development and enhancements, working with production APIs built using **Node.js (Express) and NestJS services** for mobile application workflows.
- Worked on legacy backend services built with **Node.js (Express)** and participated as a contributor in API improvements and system transitions.
- Integrated and consumed APIs backed by a **MySQL database**, ensuring smooth data flow between mobile and backend services.
- Utilized AI-assisted development tools (Claude) to accelerate backend understanding and implementation support during API integration and migration tasks.

Lovu Travel – Marketplace Platform (Mobile + Web)

Android | iOS | Website

React Native, Firebase React.js, Laravel, MySQL

- Built a cross-platform romantic travel marketplace connecting couples with hotels, travel advisors, and experience providers for personalized trip planning.
- Implemented secure **Stripe payment gateway**, authentication, and booking workflows enabling end-to-end transaction handling.
- Developed real-time chat functionality between users and travel advisors using Firebase and API-driven architecture.
- Optimized backend APIs and database queries to improve application performance, responsiveness, and overall system efficiency.

Plateaway – Restaurant Ordering Platform (Web Dashboard)

Next.js

- Contributed to frontend dashboard development with reusable components and scalable architecture.
- Integrated frontend modules with NestJS APIs and worked on enterprise-level codebase workflows.
- Collaborated with senior developers in Agile environment for feature delivery and bug fixes.

Gestfy – Field Operations Management App

Android

React Native

- Developed an ISP management mobile application with offline support and local storage capabilities.
- Improved operational efficiency through a clean UI and optimized mobile workflows for field users.

Education

Bachelor of Computer Application

2019 – 2022

St. Joseph's College of Arts and Science, Cuddalore, Tamil Nadu

Affiliated to Thiruvalluvar University

Attested for UAE
